

Doing Research Inclusively, Doing Research Well?

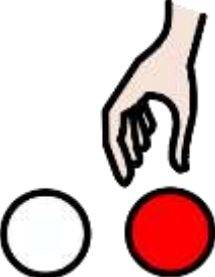

What is the project?

The project is trying to find out what makes good inclusive research.

The research questions are:

1.		How people with learning disabilities see the work in partnership with people without learning disabilities on research?
2.		What have we learned from inclusive research projects so far?
3.		How do we know if research is good?
4.		How inclusive research can be helpful to people with learning disabilities?
